

Biofilm DNA Isolation Kit

Efficiently Extract Genomic DNA from Biofilm

- ✓ Rapid and convenient method to isolate genomic DNA from different types of biofilm and biofilm forming-bacteria
- ✓ No phenol or chloroform extractions
- ✓ Yields high quality DNA that is ready for PCR and other downstream applications

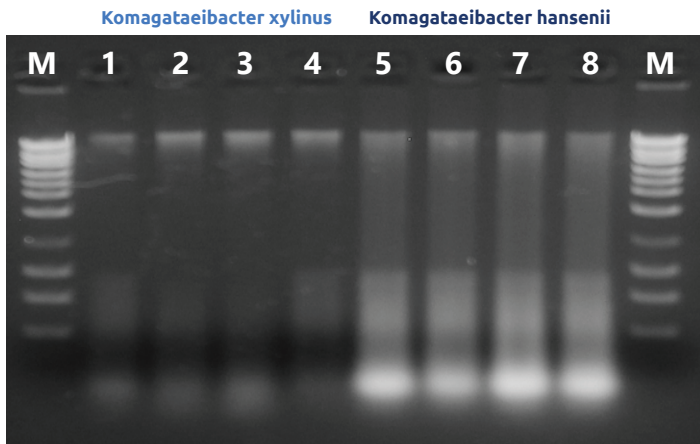

Figure 1. High quality and yield of DNA from biofilm formed by two different species, *Komagataeibacter xylinus* (1-4), *Komagataeibacter hansenii* (5-8). Lane M: Norgen's HighRanger 1 kb DNA Ladder (Cat. 11900).

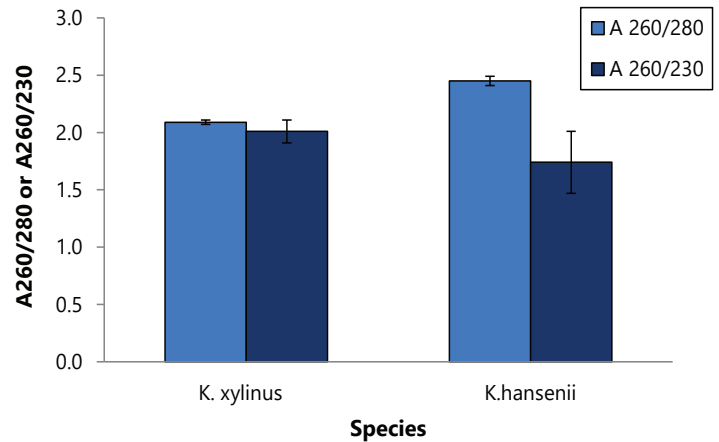

Figure 2. High DNA quality. DNA was isolated from a number of biofilm using Norgen's Biofilm DNA Isolation Kit.
